

TRIP PLANNING FOR GROUPS

If you have a **group of travellers with a specific interest** either for your religious community, club, or institution, I can help you design an itinerary that includes excursions, places, activities, and a **narrative** that will suit the interests of your group, as each group may have different interests and needs. An itinerary that may be perfect for one group may not necessarily be for another one.

As an **independent travel planner**, and external to any tour operator agency in Israel, I can help you create an itinerary based on satisfying your group's needs without any business bias.

My **personalized service** includes helping you choose the best tour operator in Israel according to your group's profile and the specific areas or niches where they may have expertise.

I will help you **negotiate the best price** according to the services you decide to include in your itinerary, and I will send you 2 or 3 quotes from different operators for you to choose from.

I will give you **advice and tricks** on how to lower the price of your itinerary in case you wish to get a price that suits your group's budget.

This service is also available for **travel agencies** from around the world who wish to start organizing trips to Israel.
